Major Software

As a Software Engineer, I use whatever language is best suited to the task. However, I am fluent in Java, C, C++, Python, and R and have experience with Lisp, Matlab, and Mathematica.

These are some of the major software projects I have worked on:

- 2020 – Present **ockhamSEM (R package)**
 Role: Co-developer (with Carl Falk)
 R package for measuring and comparing the fit propensity (parsimony) of structural equation models.
- 2020 – Present **Culturalytics (e.g. world.culturalytics.com)**
 Role: Project Director
 C++, R, JS web application for calculating and visualizing cultural distance and cultural differences between countries based on large-scale surveys of cultural values (e.g. World Values Survey).
- 2017 – Present **Cultural Distance (e.g. culturaldistance.com)**
 Role: Project Director
 R Shiny web application for calculating and visualizing cultural distance and cultural differences between countries based on large-scale surveys of cultural values (e.g. World Values Survey).
- 2013 – Present **Space-Time Database Platform (e.g. Database of Religious History)**
 Role: Technical Director
 Python Django web application to manage entering and viewing historical data, where every variable is situated in space (GIS) and time (time range).
- 2012 – 2013 **Conference Registration Platform (e.g. register.slc.ubc.ca)**
 Role: Sole developer
 Python Django web application to manage all aspects of conference registration and session sign up
- 2009 – 2010 **OpenSHAPA [also forked as DataVyu]**
 Role: Co-developer (team of 5)
 Java Open source tool for exploratory sequential data analysis.
- 2009 – 2010 **UISpec4J**
 Role: Contributor
 Java Open source UI testing framework.
- 2008 – 2009 **CSIRO In-Browser Elaborative Summariser (IBES)**
 Role: Co-developer (team of 3)
 Javascript browser extension that uses natural language processing algorithm to generate contextual summary of Wikipedia links.
- 2007 – 2008 **Application Delivery System**
 Role: Sole developer
 Multi-language; Delivery system silently installs all necessary applications from server, removes access to unauthorized applications and changes relevant system settings based on Active Directory groups on user log in.
